

## Alamogordo, New Mexico

(Continuing construction)

The project is located in south central New Mexico in Otero County, in and near Alamogordo, New Mexico. The City is situated at the foot of the Sacramento Mountains near the eastern edge of the Tularosa Basin.

The authorized project consists of three concrete and rip-rap lined diversion channels with 100-year flow capacity. The channels will safely convey flood flows through the City.

The first construction contract was awarded in December 2000. The project will be built in multiple phases with the final phase scheduled for completion in FY 2009.

The project is funded under the Construction, General appropriation.
